Brand's Success Mantra:

The Brand aims to market CD-ROMs and provide multimedia solutions to customers. It is also striving to fulfill education needs of students

Knowing the efficacy of CD-ROMs in modern time, a business dealing with converting books into CD-ROMs was initiated. Soon the company launched computer-based tutorials, which helped employees, working in various corporations, to grasp the knowledge of software on their own. Latter the company started making CDs to provide knowledge on various subjects to students, from preschool to class X, by incorporating musical rhymes that made learning easy and fun-filled. The company has also stepped into making encyclopedia and animation Cds.
